***Allowable Subject Matter***

2. Claims 1-27 are allowed over the prior art of record.

3. The following is a statement of reasons for the indication of allowable subject matter:

As per the independent claim, the claim limitations pertaining to a hierarchical document (containing a mapping of content pages of logic or dialog services) that is processed by a client to activate the content pages or the logic of the dialog services within the hierarchical structured document so as to allow a user to directly access any one of the content pages or dialog services is not explicitly taught by the prior art of record. Logan et al (5721827) teaches a server containing HTML web pages and FTP server (Fig. 1, subblock 101) and a client (Fig. 1,

subblock 103) accessing information thru an ISP (Fig. 1, subblock 121) downloading the document with the associated and needed information (col. 8 lines 45-63), but does not explicitly teach allowing the user to activate the content pages of use the logic to access dialog services. Ladd et al (6269336) teaches the allowance of the user to access the dialog service and content pages via a server (col. 9 lines 1-10, wherein the mentioned application server for web pages accesses the content servers to pull-up the associated information – col. 10 line 60 – col. 11 line 11). Hekmatpour (5644686) teaches the content to be in a structured document, with associated links, to be used by the user (col. 24 lines 30-43; col. 25 lines 15-25; abstract; col. 1 lines 7-20), but does not explicitly teach the relationship between dialog services, content pages, the server, and the user's access to such information as claimed in the independent claims as noted above.
